Dear Mr. Galan [REDACTED]

RE: Death of Maria E [REDACTED]

Date of Birth: 8 November 1964 - Date of Death: 29 December 2023

We have now received the full autopsy report which is being sent to you separately.

The medical cause of death is given as:

1a Acute myocardial ischaemia.

1b Coronary artery disease.

1c

II Type 2 diabetes mellitus

Please be aware that the Report is cold and clinical and maybe upsetting to read. It may helpful to understand the MCD:

1a is the immediate cause of death and 1b and 1c are the underlying chain of causation. If there is an entry in II it is matters that have contributed to death, but not directly related to matters in 1.

When you get the full report you may find it helpful to get your doctor to explain it to you. If the report raises any issues for you that the court should know, please get in touch.

Yours sincerely

Yousef S [REDACTED]
