

Impact Analysis of Total Productive Maintenance

Critical Success Factors and Benefits

Book | © 2019

Acknowledgements

The present project would not have been completed without the support of many people who were directly and indirectly involved, and therefore, the authors want to thank the following people and institutions:

- To all the maintenance managers and associated areas that answered our survey to gather data from their industry, who commented on it, and allowed the access to their companies.
- To all those students and coworker teachers who helped during the gathering data process from the companies.
- To the National Council of Science and Technology (CONACYT), which through the project called Thematic Network of Optimization Industrial Processes has supported this project.
- To the Secretariat of Public Education of Mexico, who through the Program for Professional Teacher Development (PRODEP) have supported this project.
- Special thanks to the Autonomous University of Ciudad Juárez (UACJ), our work and study place, for their financial support during the book translation and editing process.
- Also, our gratefulness to Alejandra Bautista, who is responsible for translating the book, and her advice and patience has contributed to this project.
